

## MULTI FOR HIM DIETARY SUPPLEMENT FACT SHEET

### FAST FACTS:

- 84% of men in America age 19-54 do not get enough vitamin E from diet alone<sup>[1]</sup>.
- 46% of men in America age 19-54 lack adequate vitamin C intake from their diet<sup>[1]</sup>.
- Yet, only 46% of American households consume multivitamins.
- Along with a healthy diet and exercise, multivitamins are an easy and cost-effective way to reduce the risk of many health problems.
- According to scientific findings, optimized levels of certain nutrients can offer more than basic insurance.
- It costs about 10¢ a day to reap the health benefits of a daily multivitamin.

### NATURE MADE MULTI FOR HIM WITH OPTIMIZED NUTRIENT LEVELS:

Nature Made Multis offer more than the promise of basic insurance by providing optimized levels of certain nutrients and a unique blend stronger than any other brand in the market. Recognizing that age and lifestyles vary and each person requires specific, optimized formulations, Multi For Him includes:

- Higher levels of B6 and B12 for heart health
- Higher levels of vitamin D to promote muscle strength and prostate and colon health
- Without iron

Based on science, Multi For Him is formulated with optimized levels of nature's essential nutrients to:

- Repair & strengthen muscle tissue for greater mobility
- Support improved heart & organ function
- Strengthen the body's ability to protect against the effects of aging
- Support mental sharpness
- Maintain cellular health

NATURE MADE  
MULTIVITAMINS:

- **Optimum level of vitamin D (1,000 IU)** – Renowned health experts and scientists from leading universities support the use of 1,000 IUs of vitamin D for a wide variety of health concerns including bone, muscle<sup>[2]</sup> and joint protection, support for colon<sup>[3]</sup> and prostate<sup>[4]</sup> health, autoimmune protection, heart health, mood health, immune system strength,<sup>[5]</sup> breast health<sup>[6]</sup> and more.
- **Higher levels vitamin C (180 mg), vitamin E (50 IU)** – Antioxidant powerhouses which help boost immunity and fight against the aging effects of free radical damage. Antioxidants are recommended as part of a daily regimen for overall health.
- **Rich in selenium (70 mcg)** – Numerous scientific studies have shown that this antioxidant helps boost the immune system and neutralize free radicals.
- **Enhanced blend of vitamin A (2,500 IU with 60% Beta Carotene)** – Another antioxidant essential for healthy vision and proper immune function. Beta carotene is a carotenoid with antioxidant properties. Low levels of retinol and higher levels of beta carotene support bone health and reduces free radical damage in the body.
- **Higher amount of vitamin K (80 mcg)** – A fat-soluble vitamin important to maintaining bone strength and heart health.

DOSAGE:

The suggested dose is one tablet daily with a meal. Each serving provides optimized levels of 23 key vitamins and minerals.

WHERE TO BUY:

Nature Made Multi For Him with Optimized Nutrient Levels is sold at food, drug and mass stores nationwide for a suggested retail price of \$9.99 per 90-count bottle.

FDA REGULATED:

Nature Made Multi For Him with Optimized Nutrient Levels is regulated by the U.S. Food and Drug Administration and various state regulatory agencies as a dietary supplement. This includes special requirements for the product's manufacturing and labeling.

USP GUIDELINES:

As an industry leader, Nature Made adheres to manufacturing standards recommended by the United States Pharmacopeia (USP), a not-for-profit organization that has set pharmaceutical and dietary supplement quality standards since 1820. Nature Made participates in USP's Verification Program for dietary supplements, which guarantees product quality, purity and potency. The USP seal can be found on many Nature Made products.
